Summary

Computer Science student driven by technology, creativity, and problem-solving, with a focus on blending coding expertise and effective communication. Experienced in developing efficient digital solutions and creating content that informs, engages, and inspires. Certified in Java programming, SQL databases, and related technologies, with strong knowledge of backend logic, data management, and software development principles. Committed to continuous learning, delivering high-quality work, and contributing to projects that combine technical precision with creative impact.

Education

COMSATS University Islamabad, Abbottabad Campus — **Abbottabad, Pakistan**
Bachelor of Science in Computer Science — *2024 – Present*

Superior College — **Pakistan**
FSC (Pre-Engineering) — *Completed May 2020*

Technical Skills

Programming Languages: Java, SQL, PHP, JavaScript, HTML, CSS
Web Development: Frontend Development (HTML, CSS, JavaScript), Backend Development (PHP), WordPress
Database Management: MySQL, SQL Server, Relational Databases, Database Design, DBMS
Cloud & Tools: IBM Cloud, Database Management Systems
Content & Digital Marketing: Content Writing, Creative Writing, Copywriting, SEO Writing, Blog Writing, Blog Management, Digital Marketing, Research-Based Content Creation
Soft Skills: Problem Solving, Team Collaboration, Communication, Analytical Thinking

Certifications

OOP in Java Programming | *Udemy* **2024**

SQL and Relational Databases 101 | *IBM* **2024**

SQL Learning Course | *MTF (Institute of Management, Technology, and Finance)* **2024**

Content Writing Certificate **2024**

Key Competencies

- Proficient in object-oriented programming with Java and database management using SQL and MySQL
- Skilled in frontend web development using HTML, CSS, and JavaScript with responsive design principles
- Experience with backend technologies including PHP for server-side development
- Strong understanding of relational database design, optimization, and cloud-based database solutions
- Proven ability to create SEO-optimized content and manage WordPress-based digital platforms
- Effective communicator with experience in technical writing and creating research-based content

Projects & Achievements

- Developed web applications using HTML, CSS, JavaScript, and PHP with MySQL database integration
- Completed multiple Java programming projects demonstrating OOP principles and software design patterns
- Created and managed content for digital platforms with focus on SEO optimization and audience engagement
- Implemented database solutions using SQL with emphasis on data integrity and query optimization
